SUMMARY

Highly motivated and skilled MERN stack developer. Committed to delivering high-quality software solutions and utilizing the latest technologies to drive innovation. Strong problem-solving skills and a solid understanding of object-oriented programming principles. A fast learner with proven ability to work effectively in both individual and team-based environments, collaborating with cross-functional teams to achieve project goals.

EDUCATION

Bachelor of Technology, Computer Engineering   *August 2021 – April 2025*
LDRP Institute of Technology and Research   *CGPA: 8.36 / 10.0 (1-7 sem)*
Skills gained: Data Structure, Database Management Systems, Object
Oriented Programming, Software Engineering, C, C++, Java, Python

SKILLS

Programming Language and Database: JavaScript, C, C++, MySQL, MongoDB
Framework/Tools/Other: Git, GitHub, Postman, NodeJs, ExpressJs, ReactJs

EXPERIENCE

LogwinTech - **Software Engineer Intern**   **1 Feb, 2025 – 26 May, 2025**

- Developed a **scalable RESTful API** for an e-commerce platform using **Node.js**, **Express**, and **MySQL**, supporting **user authentication**, **product listings**, **cart management**, and **order processing**.
- Designed and implemented a **relational database schema** in **MySQL** to handle **complex data relationships** and ensure **data integrity** across **users**, **products**, and **orders**.
- Integrated **secure authentication** using **JWT** and implemented **role-based access control (RBAC)** to manage **admin/user permissions** effectively.

PROJECTS

YelpCamp : **View & Explore Campsites**
As a **full-stack developer**, I was responsible for building a **user-friendly platform** for **campers to explore, review, and share campgrounds**.
- Designed and **implemented RESTful APIs** to manage **campgrounds, reviews, and user profiles**, enabling seamless CRUD operations and data management.
- **Integrated Cloudinary for image uploads**, allowing users to showcase campsites visually, and optimized storage to reduce server overhead, **EJS templates** for dynamic views and responsive UI design, ensuring compatibility across devices and **admin reporting system** to manage flagged reviews and content.
Tech Stack: Node.js, Express, MongoDB, Passport.js, Cloudinary, EJS, JavaScript, CSS, Git

NewsApp : **Daily News Website**
As a **frontend developer**, I was responsible for designing and building **dynamic news application** to deliver **real time updates** across various categories. My role focused on seamless **API integration, user experience optimization, and state management**.
- **Integrated NewsAPI** to fetch and display real-time news articles, enabling users to explore content across categories such as Technology, Sports, and Business.
- Implemented **infinite scrolling** to enhance user experience, providing smooth and uninterrupted navigation for large datasets.
Tech Stack: React.js, JavaScript, Bootstrap, NewsAPI, Git, VS Code

EXTRACURRICULAR ACTIVITIES

Udemy: Completed **"Mastering Data Structures & Algorithms in C++"** course designed by Abdul Bari.
Udemy: Completed **"Web Development Course 2024"** course designed by one of the best instructor Angela Yu.
